THE PROBLEM

Legal teams at growing companies review **50–200 contracts per month** manually.

Each review takes

3–5 hours and costs the company **\$300–\$800 in lawyer time.**

Slow turnaround

Deals stall for days waiting on legal review. Sales teams lose momentum and sometimes lose the deal.

Expensive mistakes

Junior lawyers miss non-standard clauses. One bad contract cost a Series B company \$2.1M in penalties.

Lawyer burnout

80% of in-house counsel cite contract review volume as their top source of dissatisfaction and turnover.

Upload a contract. Get a full risk analysis in 12 minutes.

01

Upload

Drag and drop any PDF, DOCX, or DocuSign contract. Supports English, French, German, Spanish.

02

Analyse

Our model — trained on 2M+ legal documents — identifies risk clauses, non-standard terms, and missing provisions.

03

Review

Get a plain-English summary, risk heatmap, and suggested redlines. One-click export to Word with tracked changes.

Accuracy: 94.3% on clause identification vs. senior associate benchmark • Average time saved: 3.8 hours per contract

MARKET SIZE

TAM — \$50B

Total global legal technology market (Grand View Research, 2024)

SAM — \$12B

SMB-focused contract management and review software

SOM — \$1B

2% of SAM. Our target: 5,000 companies paying \$200/month average

** Market sizing based on industry reports. SOM calculated as 2% of SAM addressable within 3 years.*

WHY NOW

AI is transforming every industry

Large language models have reached a capability threshold that makes complex document understanding possible at scale. The technology is ready.

Legal tech adoption is accelerating

Spending on legal technology grew 32% in 2023. Enterprise legal departments increased software budgets by an average of 28% year-over-year.

Remote work expanded the legal bottleneck

Post-pandemic distributed teams created more contracts, NDAs, and vendor agreements than ever before — without adding headcount.

SMBs now demand enterprise-grade tools

The no-code and SaaS wave has conditioned SMB buyers to expect sophisticated tools at accessible price points. The market is primed.

PRODUCT
